**Dangerous goods & prohibited items in baggage**

- **Batteries**
  - Devices in checked baggage must be completely separated from the batteries.
  - Batteries may not be packed with anything.

- **Medical Devices**
  - Batteries must be completely separated from the medical devices.

- **Phones, Laptops, and Tablets**
  - When carried by passengers.
  - Switched on

- **Portable Oxygen Concentrators (POC)**
  - Battery powered devices
  - Batteries must be completely separated from the medical devices.

- **Portable Electronic Devices**
  - Including medical devices such as
    - Fuel cell cartridges
    - Spare Batteries

**NOTE:**

- Danger Goods Regulations Special Provision A41
- Special Provision A70
- Electric Mobility Aids
- A41

- **Fuel Cells**
  - Carried in carry-on baggage only
  - Must not exceed a Watt hour rating of 100Wh.

- **Personal Vaporizers**
  - Containing batteries must be implanted into a protective pouch.

- **Avalanche Rescue Backpack**
  - Must be carried in carry-on baggage only
  - Must not exceed a Watt hour rating of 100Wh.

- **Christmas Crackers**
  - May be carried in checked baggage
  - Must not exceed 80cm in length

- **Propane or Butane Gas**
  - No more than one per person.

- **Flammable, Non-Toxic Gas**
  - In checked baggage only
  - Internal combustion engines
  - Gas cartridges, small, non-explosive gas cylinders
  - Propane or Butane gas

- **Liquefied Compressed Gases**
  - Gas cartridges
  - Must not exceed a total net quantity of 0.5 kg
  - In leak-proof and puncture-resistant material
  - Having a sealed inner liner or a bag of strong protective pouch

- **Dry Ice**
  - Articles which have the primary purpose as a refrigerant
  - Must have their fuel attached
  - Are normally not permitted
  - Baggage or on the person
  - Waste Heat, which would cause a fire

- **Cigarettes**
  - Must not exceed 100 cigarettes or 25 cigars
  - No more than 500 grams of tobacco
  - Must be in a moistureproof and airproof bag

- **Fireworks, including party poppers**
  - Forbidden

- **Aerosols**
  - Must meet IATA Dangerous Goods Regulations
  - Special Provision A74

- **Candles**
  - In checked baggage only
  - Must not exceed a Watt hour rating of 100Wh.

- **Electronic Device is Not in Use**
  - Must be durably marked by the manufacturer:
    - It cannot be accidentally activated

- **Batteries**
  - Must not exceed a Watt hour rating of 100Wh.
  - No more than two spare batteries may be carried in checked baggage.
  - Must be individually protected so as to prevent short circuits.

- **E-Cigarettes**
  - Must be carried in carry-on baggage only

- **Swiss Army Knives**
  - Must not exceed 10 cm in length

- **Oxygen Concentrator**
  - Battery powered devices
  - Batteries must be completely separated from the medical devices.

- **Portable Electronic Devices**
  - Including medical devices such as
    - Fuel cell cartridges
    - Spare Batteries

- **Avalanche Rescue Backpack**
  - Must be carried in carry-on baggage only
  - Must not exceed a Watt hour rating of 100Wh.

- **Christmas Crackers**
  - May be carried in checked baggage
  - Must not exceed 80cm in length

- **Propane or Butane Gas**
  - No more than one per person.
